of solid timber floors
quality and design*

TOPDECK FLOORING

Topdeck Flooring

As a leading timber floor wholesaler and supplier in Australia, we declare that all products imported by Topdeck Flooring are legally sourced and logged from sustainable managed forests. All of our partners and factories are held with FSC or PEFC Chain of Custody Certifications and our product is purchased within scope of certifications.

Things you need to consider before selecting a timber product:

1. TIMBER GRADE
2. COATING FINISH

TIMBER GRADE

Select Grade

This is the highest grade of timber, which only contains features of a minimum number and size. Although the features may still be observable, such as gum veins, past borer activity and small knots, but they do not dominate the overall appearance.

Standard and Better Grade

A Standard Grade floor may have significantly more character than a Select Grade floor, which is the most typical and moderate features of Australian grade flooring. Our Standard and Better Grade floor only contains features such as gum veins, past borer activity and small knots in a limited number and size. This limited level of natural features best suit for a modern style.

It should, however, be noted that the features present and resulting character is very much dependent on the species chosen.

In Topdeck Solid Timber Range, we only supply the above two grades of floor boards.

COATING FINISH

American Coating Master - 12 Layers of PPG Water Based Polyurethane Finish.

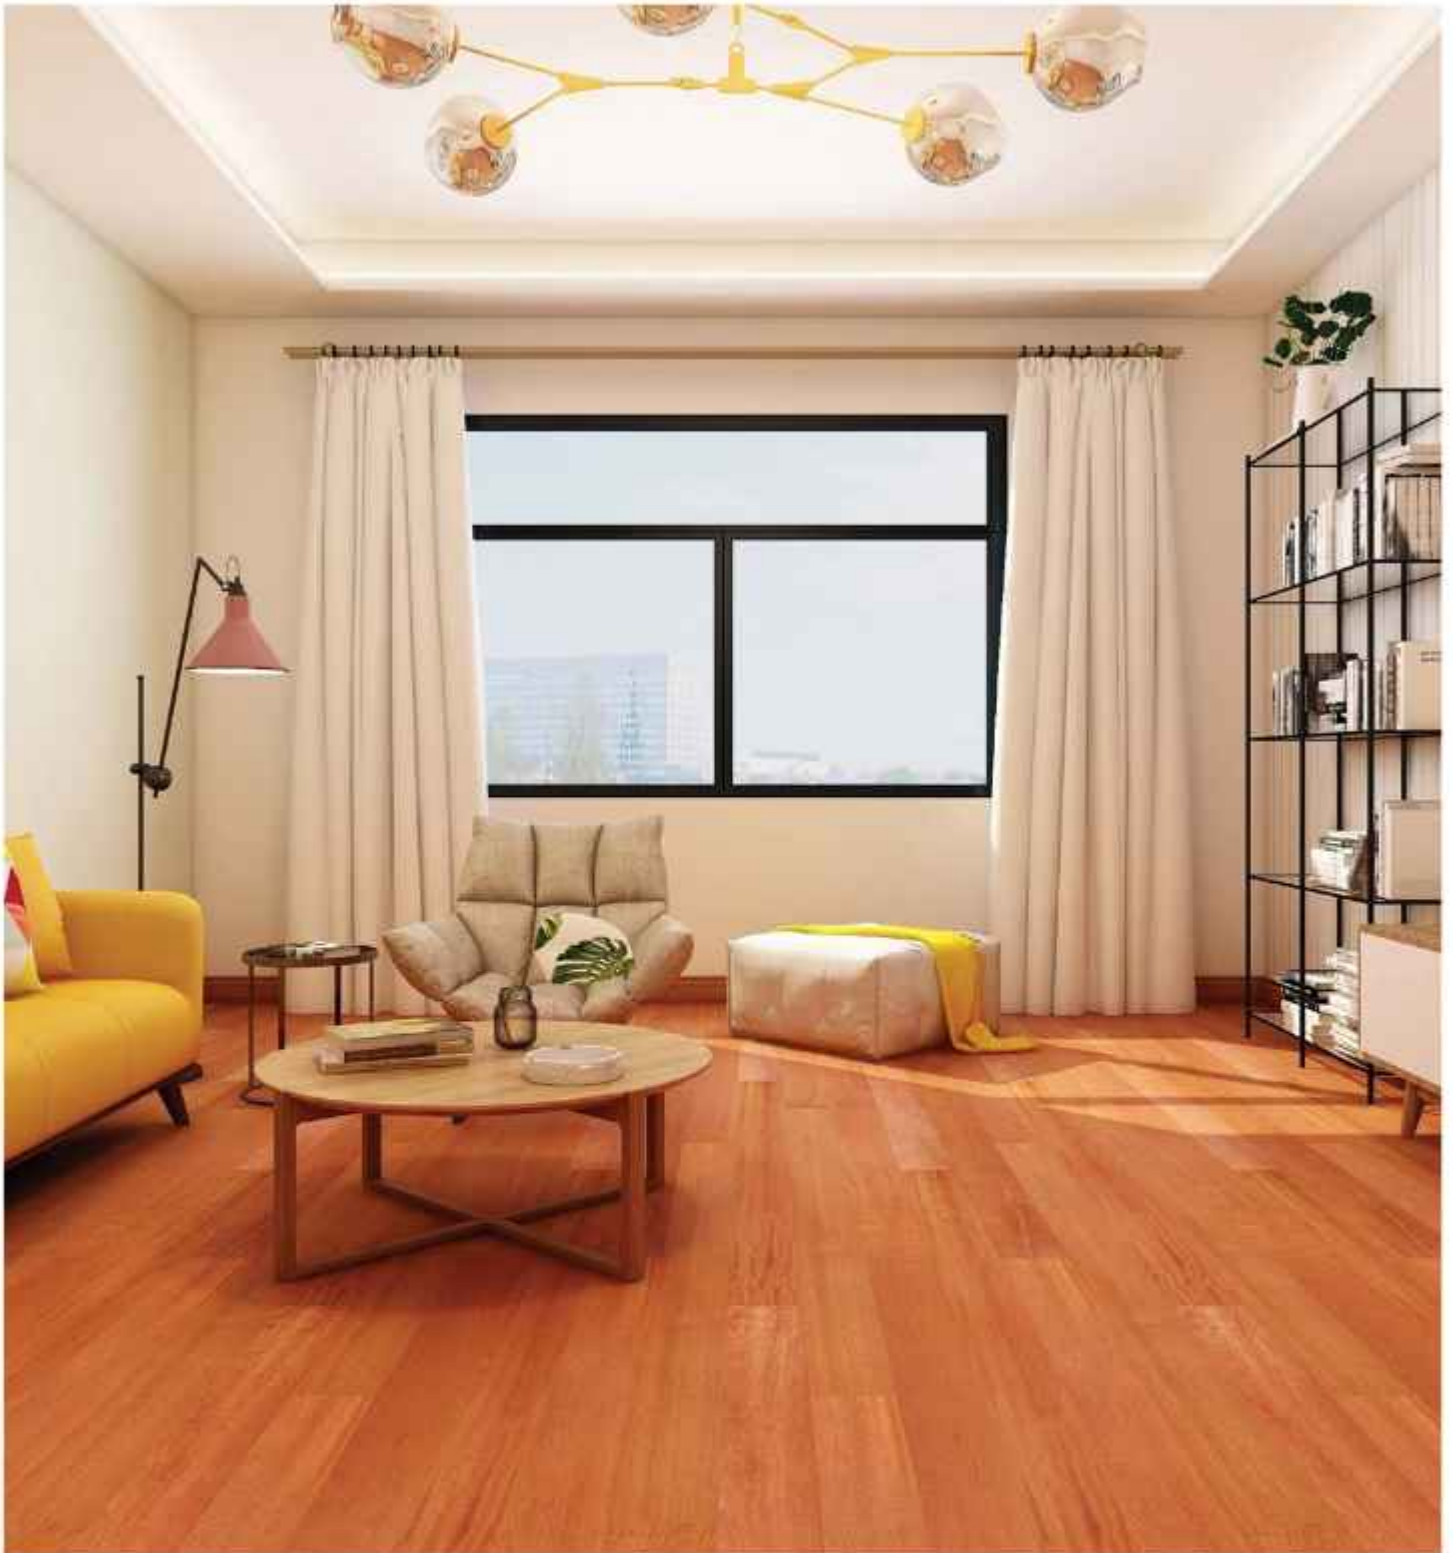

Designed to enhance the naturalness of wood material with supreme abrasion resistance, indentation hardness & scratch resistance, prevent hard wood flooring products from everyday signs of wear and prolong their service life.

PPG Coating-Adding value to your floor.

SPECIES	JANKA RATING	HARDNESS
Tasmanian Oak	5.8	Moderately Hard
Jarrah	8.5	Hard
Kempas Red Stain	9	Hard
Kempas Natural	9	Hard
Australian Blackbutt	9.1	Hard
Sydney Blue Gum	9.1	Hard
Brush Box	9.1	Hard
River Red Gum	10.7	Very Hard
Keranji - King Teak	11	Very Hard
Pacific Spotted Gum	11	Very Hard
Australian Spotted Gum	11	Very Hard
Pacific Blackbutt	11.8	Very Hard
Jatoba - Brazilian Cherry	12	Very Hard
Red Iron Bark:	13	Extremely Hard
Grey Iron Bark	14	Extremely Hard
Cumaru - Brazilian Teak	15.7	Extremely Hard

JANKA RATING CHARTS

Janka Rating	Hardness Category
<5.5	Soft
5.5 to 7	Moderately Hard
7 to 10	Hard
>10	Very Hard

Please Note: Hardness is just one criteria and many of the other criteria are often more important. Moderately hard and above are well suited to domestic floors. Soft is also fine if greater propensity to indentation is not a concern.

Combining quality & environmental control standards throughout the manufacturing process.

As timber is a natural product, the colour, grain and feature patterns may vary in the flooring as in the printed media and samples provided. For detail maintenance & installation guidelines please refer to the website.

*Quality is our attitude, as we are
always striving to meet and exceed
our customers expectations.*
