Beautiful herringbone designs, now developed with rigid core!

Belle Vië Herringbone Hybrid floor represents the next generation of Hybrid Flooring, utilizing advanced manufacturing techniques to develop multi-layer rigid composite core planks (RCP). Its solid core construction and high density allow for a truly waterproof board, making it indentation resistant. The enhanced multi-layer rigid core construction also provides excellent performance characteristics, with little to no floorboard movement.

Arriving with 12 new wood designs, Belle Vië Herringbone Hybrid allow you to showcase natural beauty whilst maintaining the durability and waterproof qualities of luxury herringbone floor. Coupled with our creation of more non-repeat pattern, these floorboards behold outstanding visual longevity. By utilizing the world's most advantaged click system – Valinge 5G Click, herringbone floor has never been so easy to install!

With our herringbone hybrid, we recreate the realism of natural wood with significantly more comfort compared to its natural counterpart. The application of world's latest ultra matt PU Coating combined with lightly brushed surface also makes the herringbone floor significantly closer to natural timber, it's virtually impossible to distinguish between our Belle Vië Hybrid line and traditional authentic timber floorboards.
